QUILT - eco-fabulous rustic chic

QUILT debuts this year, a completely new line of furniture from the Mamagreen™ brand, supernova in the morning sky. This range is built around Batyline®, Ferrari's time-tested all-weather fiber, woven in a radically novel way. You have the choice of four different fabrics – closely woven sling in pure black or solid white; canatex, synthetic fibers combined with hemp in a trendy taupe color; and closely woven, recycled espresso brown. Covering this extensive range of extremely comfortable chairs, lounges and sofas, the Batyline contrasts stylishly with brushed stainless steel bases. The chairs and lounges are covered with slender strips of Batyline® while the sumptuous sofas are covered with broad strips of this super tough material and complemented by Sunbrella® cushions, begging for someone to fold into them. Combined with tables of varying sizes all made from fsc-certified recycled teakwood, the chairs of techno-fiber complete a daring dining setting.

About MAMAGREEN

Mamagreen was launched in 2007 and is the fastest growing high-end outdoor furniture brand. Known for its contemporary eco-friendly furniture, the Belgian brand prides itself on innovative design, catering to a niche market and receiving praise from global furniture experts.

Mamagreen's furniture is available at more than 50 retail shops in the USA, Australia and in most European countries.
